The 3 Most Important Search Marketing Tools… Your Heart, Your Brain, & Your [Small] Ego

Small Ego

Intellectual Humility

Intellectual humility is simply "the recognition that the things you believe in might in fact be wrong"

-- Mark Leary, personality psychologist at Duke University

"NOT KNOWING THE SCOPE OF YOUR OWN IGNORANCE IS PART OF THE HUMAN CONDITION"

-- David Dunning, an expert on human blind spots

Some things about ourselves exist below the surface

Tepoztlán, Mexico

FOUNDERS PROJECT

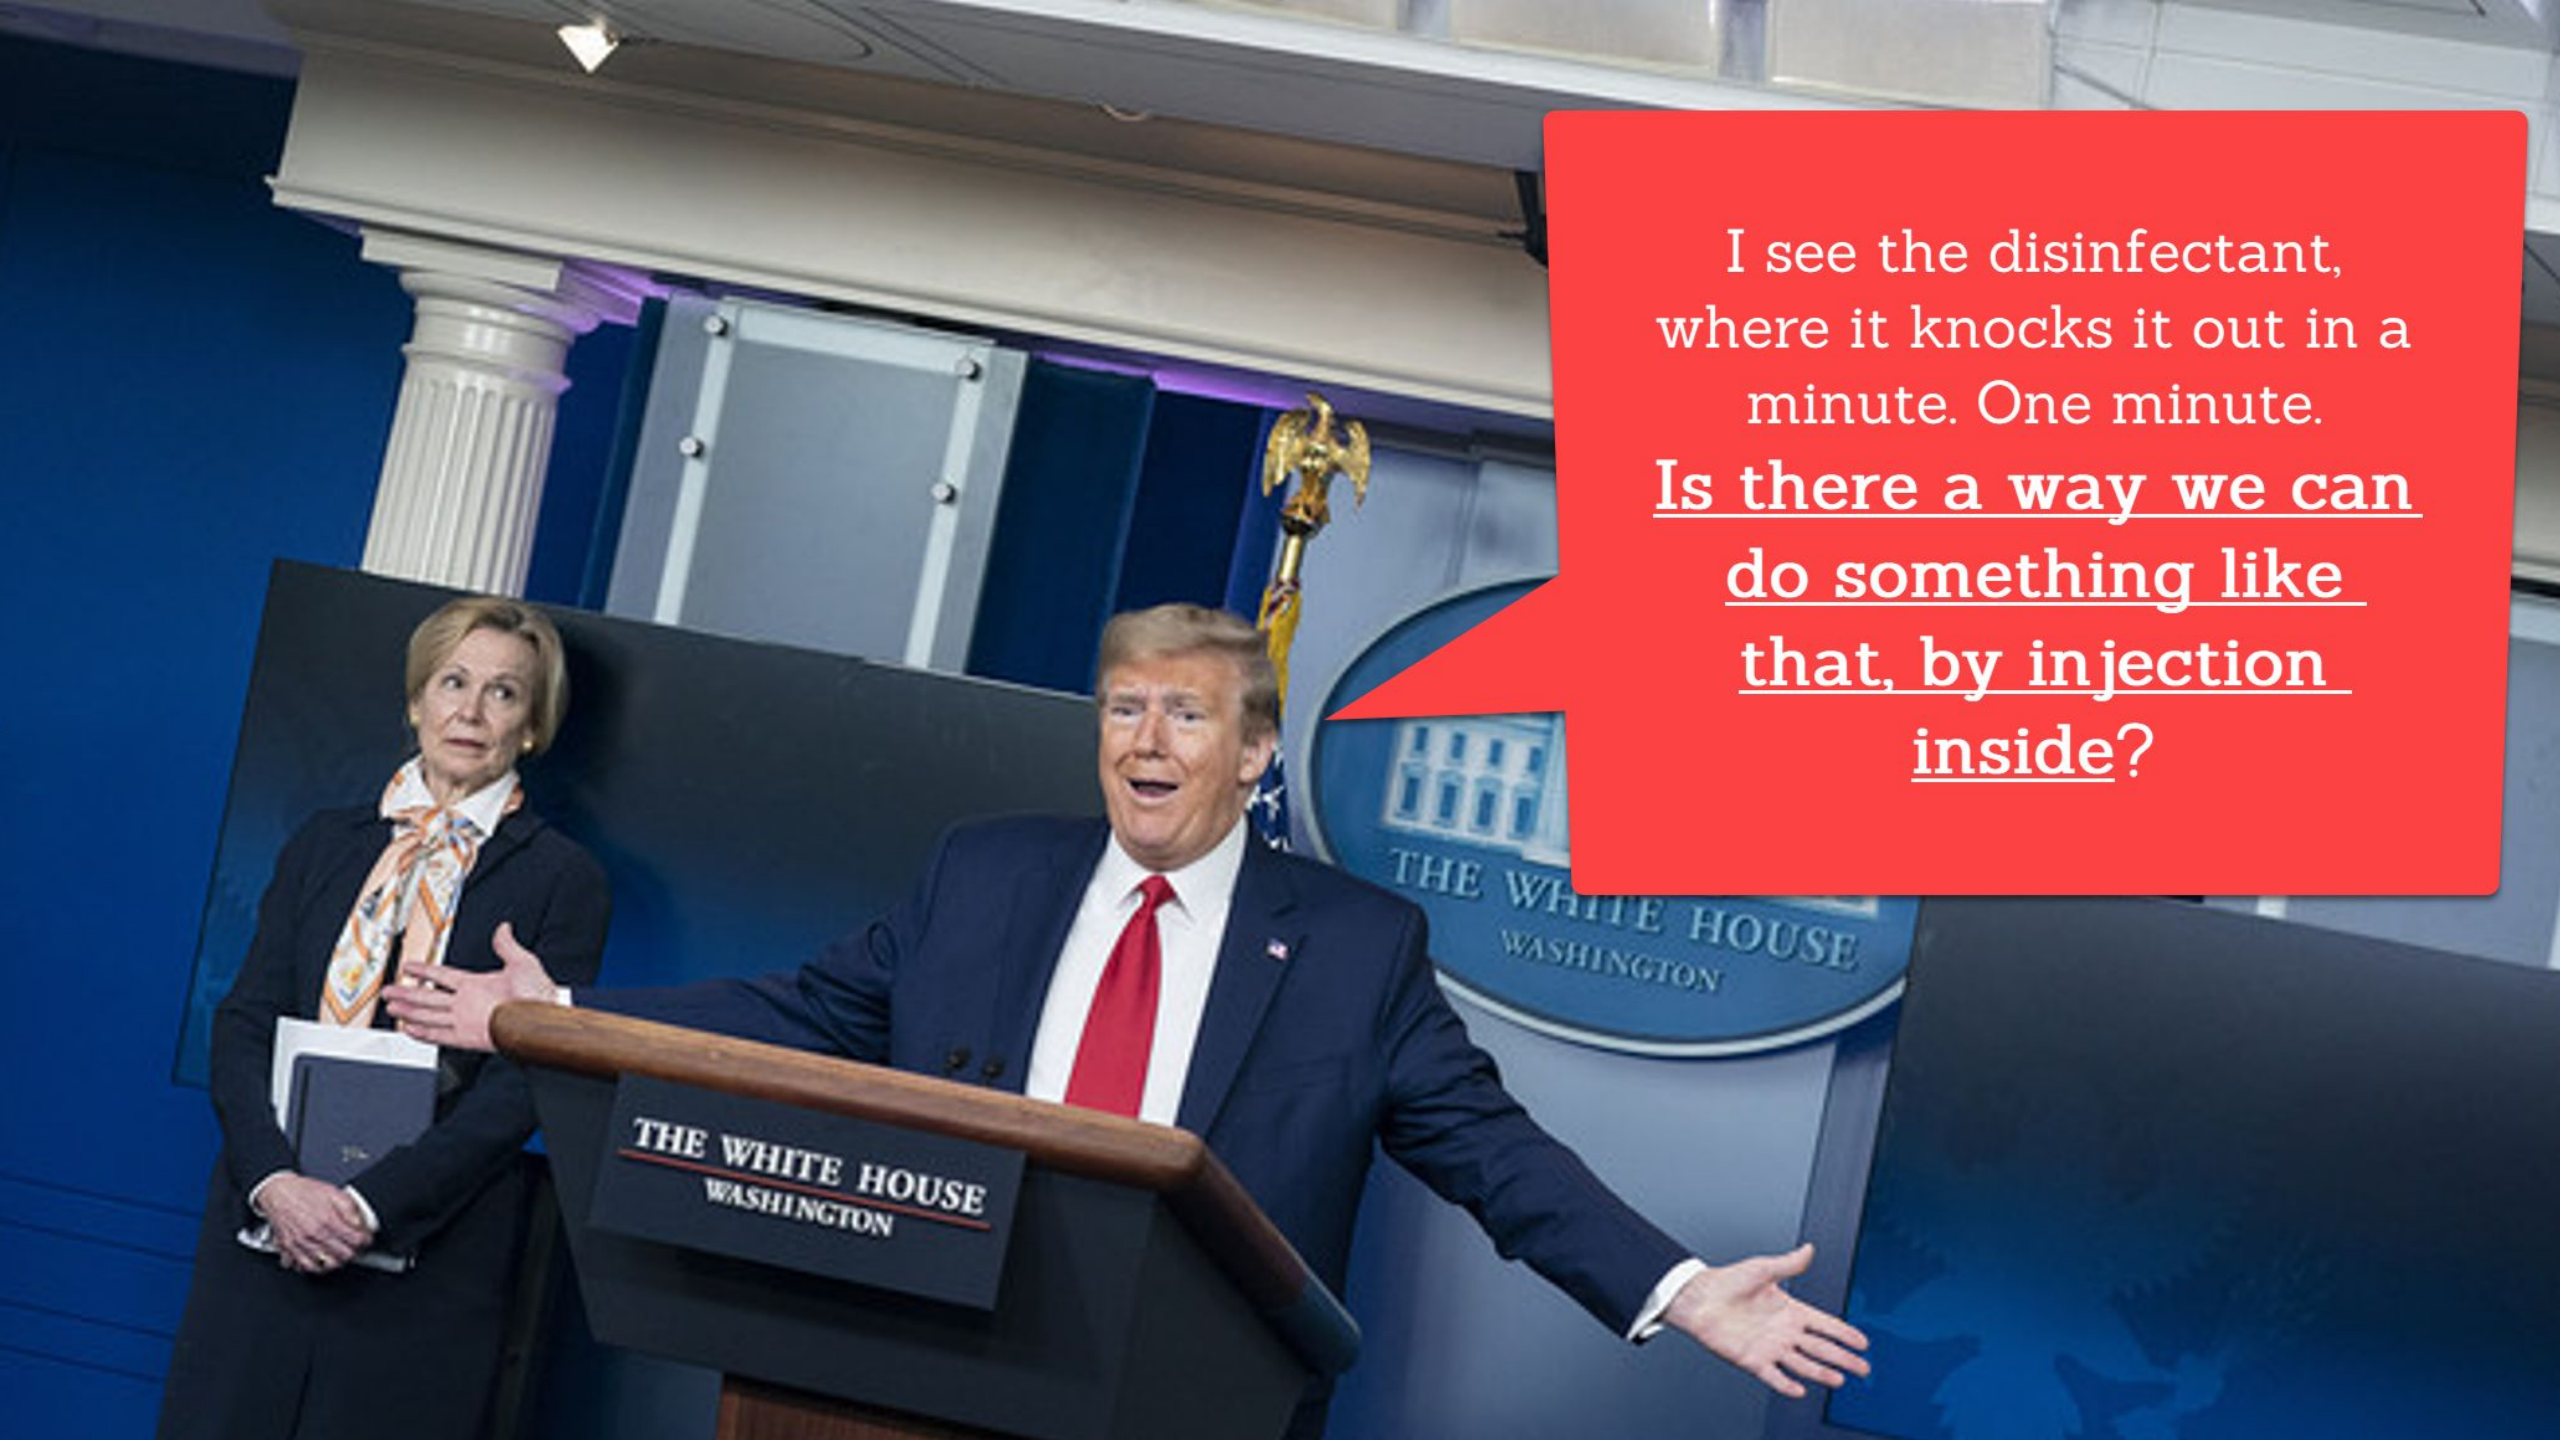
Warby Parker Had a Mission. Its Customers Didn't Care. Here's How the Company Changed Its Message

The eyeglasses company loved touting its 'buy one, give one' social mission. But it failed to move customers, and the startup was forced to change gears.

BY CHRISTINE LAGORIO-CHAFKIN @LAGORIO

Where do you start?

Listen to the people who say
there might be a better way.



I see the disinfectant, where it knocks it out in a minute. One minute.
Is there a way we can do something like that, by injection inside?

Tactical SEO: How Many Terms/Phrases Should I Target on a Single Page?

On-page SEO

The author's views are entirely his or her own (excluding the unlikely event of hypnosis) and may not always reflect the views of Moz.

102

55

This one keeps popping up, so I'm taking a short blog post to address it as quickly and efficiently as possible (mostly because I have an SEOmoz board meeting tomorrow, so I need my zzzs).

Many SEOs ask themselves how many individual word and phrases are ideal to target together on a single URL. The tough part is - there's no hard and fast answer. The number can be as low as 1 and as high as 15 (maybe 20). Below, I'll share the process I like to use to find the right answer and include a real life example to help illustrate:

Choosing Keywords for the Page:

We're not playing long tail with targeted SEO like this, so you'll want to do your keyword research

What is DevOps?

Get Started with AWS

DevOps on AWS | DevOps Blog | Partner Solutions | Resources | The Amazon Builders' Library

DevOps Model Defined

DevOps is the combination of cultural philosophies, practices, and tools that increases an organization's ability to deliver applications and services at high velocity: evolving and improving products at a faster pace than organizations using traditional software development and infrastructure management processes. This speed enables organizations to better serve their customers and compete more effectively in the market.

1158 keywords top 20, $33k / year

How DevOps Works

Under a DevOps model, development and operations teams are no longer "siloed." Sometimes, these two teams are merged into a single team where the engineers work across the entire application lifecycle, from development and test to deployment to operations, and develop a range of skills not limited to a single function.

In some DevOps models, quality assurance and security teams may also become more tightly integrated with development and operations and throughout the application lifecycle. When security is the focus of everyone on a DevOps team, this is sometimes referred to as DevSecOps.

These teams use practices to automate processes that historically have been manual and slow. They use a technology stack and tooling which help them operate and evolve applications quickly and reliably. These tools also help engineers independently accomplish tasks (for example, deploying code or provisioning infrastructure) that normally would have required help from other teams, and this further increases a team's velocity.

Search Discovery Analysis

The goal of the Search Discovery Analysis is to give a holistic view of the competitive landscape and play a key role in creating a long-term online strategy, assessing how Client compares to competitors' site authority, contextual relevance, and visibility. Seer will examine gaps in Client's keyword coverage by examining top Search & Business competitors to identify new opportunities.

Toyota Corolla insurance cost

Insurance for the Toyota Corolla costs $2,245 per year on average across the six model years we considered, for our adult male profile driver's full coverage car insurance policy. This rate is only slightly greater — it is 2% more per year — than the cost of identical coverage for a Toyota Camry. However, young drivers can expect to pay much more for coverage, as we found that average annual premiums for 18-year-olds to be $8,429.

Year & Model	Annual premiums for a 30-year-old	Annual premiums for a 18-year-old
2019 Toyota Corolla	$2,299	$9,483
2018 Toyota Corolla	$2,362	$9,267
2017 Toyota Corolla	$2,331	$8,480
2016 Toyota Corolla	$2,271	$8,290
2015 Toyota Corolla	$2,144	$7,940
2014 Toyota Corolla	$2,063	$7,112
Average	**$2,245**	**$8,429**

On average, insurance for newer Corollas is more expensive than it is for older models, with the 2019 model costing 11% more for our 30-year-old driver and 33% more for our 18-year-old driver compared to the cost of coverage for 2014 model. This difference in premiums is largely due to the
